

Work Experience

Okendo (Jan 2025 - Present)

Senior Software Engineer

- Implemented real-time data pipelines using DynamoDB Streams and AWS Lambda to sync data into Redshift for analytics and Elasticsearch for fuzzy search.
- Reduced Lambda costs by 70% by migrating embeddable applications from Puppeteer-based rendering to Vue SSR, significantly improving performance and resource efficiency
- Created custom hero sankey diagram component using d3-sankey for visualising sequences, providing customers with actionable insights into user journey sequences and identifying key friction points to drive higher review rates
- AWS Redshift optimisation, focusing on data distribution and query patterns, improving query performance by up to 50% in some cases
- Developed enterprise reporting solutions, encompassing complex SQL optimization, interactive data visualizations, and scalable UI components

Technology: AWS Serverless (Lambda, SQS, API-Gateway, Cognito, DynamoDB, OpenSearch, Redshift), Terraform, Angular, React, Remix, Vue, Shopify, TypeScript, D3

Megaport (Jan 2021 - Jan 2025)

Senior Frontend Engineer

- Led the upgrade of applications from Vue 2 to Vue 3, providing mentorship and support to junior frontend developers throughout the process
- Contributed to the development of a Vue 3-based UI Library for the upgrade initiative, utilizing TypeScript, Vue 3, and Tailwind CSS
- Worked on major feature enhancements to Megaport's flagship client portal, including a comprehensive overhaul of the authentication system to AWS Cognito
- Designed and implemented a frontend monorepo infrastructure using NX, including a dynamic CI pipeline to ensure efficiency and reliability
- Automated the QA teams smoke tests using Playwright, improving efficiency and reliability in the testing process and validating critical functionalities

Technology: Vue.js, Nuxt, JavaScript, TypeScript, Pinia, Tanstack Query, Vuex, Playwright, Vite, Webpack, Vitest, Jest, Tailwind, SASS, Storybook

Logicly (Dec 2010 - Jan 2021)

Senior Full Stack Developer | Feb 2014 – Jan 2021

- Demonstrated adaptability in a dynamic environment at Logicly, cultivating a diverse skill set in web development
- Specialized in frontend development with a focus on Single Page Applications using Vue and AngularJS frameworks
- Proficient in backend API development with expertise in Perl and Ruby, leveraging Docker for containerization
- Implemented a company-wide development stack with Docker for offline and production-like environments
- Provided mentorship and guidance to junior developers, contributing to their professional growth within the team

Full Stack Developer | Dec 2010 - Feb 2014

- Prior to my promotion to Senior I was mostly focusing on maintaining and enhancing the WebSurvey platform

Technology: AngularJS, Vue.JS, Perl, Python, Ruby, Docker, Vuex, Webpack, SASS, JavaScript, Postgres, DynamoDB, S3, MySQL, OpenAPI

Education

RMIT

Jan 2009 – Dec 2012

Bachelor of Computer Science
